

# The Highest Risk

June 6, 2011

Tony Hayward

Q. Well, what you did know, though, was that DEEPWATER blowout was the highest risk across the entire corporation and that it was the highest risk for your Exploration and Production Unit, wasn't it?

**A. It was certainly one of the highest risks for the corporation. It was the highest risk in the Gulf of Mexico and one of the highest risks for the Ex – for the Exploration and Production Unit.**
