# Playbook for GOM Cementing Jan - June 2010

Category	Action Item	Person Responsible for Completion	Expected date of completion	Date Closed
<b>Safety</b>	Determine participation requirements for PPR's for 2010	Mike Gouner	Mar-10	Apr-10
<b>Service Quality</b>	Present to all DW AR's and operations work processes for working with APC in DW. Each account identify minimum process for all.	Richard Vargo/Roger Dugas	Jun-10	Jul-10
	Assure Technical recommendations on slurry designs. All designs must have check off from Technology (either Technical Advisor, Account Rep or Technical Professional)	Mike Serio/George Fuller	Jun-10	10-Jul
	Establish context for training Technical Professionals/Account Reps in the form of teaching them how to execute cementing value proposition - tuned solutions.	George Fuller/Mike Serio	Jun-10	10-Jun
<b>Strategy</b>	Establish new successful job criteria, execute the job as designed. Density requirements met (+/- 0.3 ppg), utilize available equipment (CMS, ADC)	Richard Vargo/Roger Dugas	Apr-10	10-Apr

Comments	
We are changing the way that we will utilize our programs. We will establish participation definitions for our safety programs and work this into our 2010 PPR.	
We will use what we learned in the APC investigation and translate that into our Deepwater Processes for working in Deepwater in the GOM.	
All recommendations for cementing work will include the assistance or sign off by either technology or technical sales to insure that the highest quality designs are being considered. Making sure that our solutions meet the customers needs and assuring that we are using all tools such as our database and simulations to design the solution.	
We will define in a short statement what the term "Successful Job" means to Halliburton. This will include the fact that we will only pump the job as designed, we will use the latest technology (all of our equipment CMS, ADC etc) and we will do it in the most safe, efficient and reliable manner known in the service industry. These standards will be rolled into each Service Supervisors PPR and they will be held accountable.	

# Playbook for GOM Cementing Jul - Dec 2010

Category	Action Item	Person Responsible for Completion	Expected date of completion	Date Closed
<b>Safety</b>	Establish Safety Steering Committee	Mike Gouner	Jul-10	Jul-10
<b>Service Quality</b>	Identify 5 gates for delivery and Re-Organize group around delivery for Deepwater	Richard Vargo/Ronnie Faul	Oct-10	Dec-10
	Establish Cementer Certification process as a result of NTL's for implementation after the Moratorium.	Vance Etter	Nov-10	
	Organize group around the delivery of services and technology for the execution of BP Macondo Kill operations.	Richard Vargo/Ronnie Faul	Jul-10	10-Jul
<b>Strategy</b>	Establish Protech BAP, people process and technical process for CRB and DRB for 2011. Review strategies for Protech as well as 5 Forces.	Richard Vargo / Jasen Bradley	Dec-10	

### Comments

Established monthly review of safety incidents with content of meeting focused on prevention and training objectives.

We will use what we learned in the APC investigation and translate that into our Deepwater Processes for working in Deepwater in the GOM.

We will build a cementer certification process and review our abilities to train and develop our people resources around the delivery of DW cementing.

Assure that technical resources are moved into bp as well as operational resources to deliver flawless execution of services and technology to bp through the kill operations on the Macondo well.

We will define the business acquisition process, our people process and technical process for Protech delivery and assure we are able to deliver the planned revenue for 2011. As well we will re-look at our Account Rep group and establish a sales group around Protech and the delivery of revenue.

## **Core Process Definitions**

### **Core Process #1 - Opportunities (How we track our opportunities to make money)**

This is where all opportunities for work will reside. Permits, as well as all identified opportunities will be tracked here. Account reps as well as Account Leaders and Sales Managers can populate an opportunity here. If you are identified as the person to close out the opportunity you will need to do that. This will be reviewed on a weekly basis in our Monday morning call but needs to be a living document that is updated regularly.

### **Core Process #2 - Threats (How we track threats to prevent from losing money)**

This is where all threats to our market share will reside. Any identified threat needs to be tracked here. Account reps as well as Account Leaders and Sales Managers can populate any threat here. If you are identified as the person to close out the threat you will need to do that. This will be reviewed on a weekly basis in our Monday morning call but needs to be a living document that is updated regularly.

### **Core Process #3 - Proactive Service Quality (How we prevent from giving money back)**

This is where our Electronics Maintenance Supervisor as well as our Mechanics Supervisor will update any requests for service on our rigs in order for our BD and Operations group to have visibility to issues which could cause an irregular job or service quality incident. This is updated regularly by our maintenance group.

### **Core Process #4 - Reactive Service Quality (How we manage investigations and minimize giving money back)**

This is where we will track all ongoing investigations so that BD as well as operations has visibility to any investigations that involved a service quality incident. Our Technology group will have visibility and maintain this spreadsheet.

# 2010 Opportuni

## heduled Maintenance

Action Taken	Completed By	Responsible	Status Complete (Y/N)	Comments
Changed out radiator	Diesel Tech	Monte Bates	Y	Foreign debris picked up by and went through radiator.
Reseal pump	Heath Giroir	Monte Bates	Y	Oiler tank pressure set at 25 psi
Increase engine RPM and adjust volute.	Heath Giroir	Monte Bates	Y	No fault found.
PSI had wrong numbers in Unipro, Bad Mag Pickup	Patrick Reading	Billy Crabtree	N	Mag Pickup Replaced, Signal still noisy, Believe problem is with Mag Pickup Mounting device
Changed Unipro, Set open/Closed Voltage, Set Water Delivery Rate to 6.8	Steve Brouwer/Gary Eldred	Billy Crabtree	Y	Job for 2/13, We will look at charts
Cold Start Unipro, Auto Cal to Water	Kenny Melancon	Billy Crabtree	Y	Fixed over Phone, Densometer last calibrated 1999, Cementer said to wait until rig goes to shipyard to replace
Cold Start Unipro, Re enter Cal Data	Kenny Melancon	Billy Crabtree	Y	Corrected over phone, Cementer did not call back
sent mechanic with new controllers	dannos	Monte Bates	Y	mechanic is still on location
removed connections cleand and retested	MSI	monte bates	Y	mechanic is still on location
robbed valve and sent out to cementer	Richard Mahoney	Billy Crabtree	Y	Cement Valve Grease Locked, Rebuilt on Location
<b>Replaced Unipro</b>	<b>Richard Mahoney</b>	Billy Crabtree	N	Unipro will be repaired at shop
Wrote Procedure and sent it to cementer via email.	<b>John Thompson</b>	Billy Crabtree	Y	
Part Taken from Y-Delta Started on yard and sent to rig	Rock's Electric	Billy Crabtree	Y	Will be changed by Rig Electrician
Found no Electronic Issues	Kenny Melancon	Billy Crabtree	Y	Waiting on Cementer to set up transportation
Reset Rig System	Billy Lacoste	Billy Crabtree	Y	Repaired on rig
sent new oil filters and mechanic to check out	J. Bascle	Monte Bates		still on location
check out trans.		Monte Bates		still on location
sent mechanic to lach pump and check unit	T. Gravois	Monte Bates	Y	readjusted rpm on pump cleaned screens and run and tested unit
Intermittent Connection	Gary Eldred	Billy Crabtree	Y	
Sent Parker Valve to rig	Robert Yount	Billy Crabtree	Y	Repaired bt Cementer
ship parts and replace		Monte Bates	N	mechanic still on rig
ship parts and replace	Heath Giroir	Monte Bates	N	mechanic still on rig
ship parts and replace	jonathon danos	Monte Bates	Y	mechanic still on rig finishing PM but hyd.pump install and working fine.
bought cement air chipping guns and sent 2 mech.	t.gravois @d.morrill	Monte Bates	N	mechanics still on rig
Changes Edgeport, Rebuilt 5 Pin Connector	Gary Eldred	Billy Crabtree	Y	
sent Force Power to check engine out	force energy	Monte Bates		
sent out mechanic with parts to change turbo	Tom Avet	Monte Bates		
Could Not Duplicate original problem. Found and changed 1 Mag Pickup with scratches and build up	Willie Lebouef	Billy Crabtree	Y	
sent mechanic with seal kit	J. Danos	Monte Bates		
sent mechanic with seal and gasket	T. Avet	Monte Bates		
sent mechanic with tech. to check out	Gravois	Monte Bates	Y	Been resolved.
New Densometer sent to rig		Billy Crabtree	N	Will send Tech after Densometer gets to the rig
