**From:** Richard Vargo  
**Subject:** Announcement of Changes to Cementing Org Structure - GOM Cementing

We are pleased to announce that **Ronnie Faul** has accepted the position of Sr. Technical Professional Manger for the GOM Cementing PSL effective April 16th. Ronnie will have direct responsibility for all GOM Cementing Technology. He will be based in Houston and report directly to me.

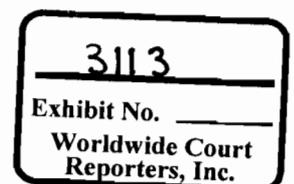

Reporting to Ronnie will be our in-house Technical Advisors as well our Technical Professionals in the field, Technical Sales Advisors and the Fluids lab.

Ronnie graduated from McNeese State University with a degree in Electrical Engineering in 1973. He began his career as an Engineer in Training in Lake Charles, LA. In 1974 he was promoted field engineer working out of Harvey, LA. Ronnie has worked 36 years for Halliburton holding positions in field engineering, sales, engineering management, and field management in the Gulf of Mexico and South Texas. Since 2006, Ronnie was Global Technology manager for the cementing product service line.

Ronnie has co-authored 17 industry technical papers on cementing and holds 12 patents on cementing and sand control processes. He has received a meritorious engineering award related to Deepwater Shallow Water Flow Cementing and served on API workgroups related to Deepwater Cementing and Flow after cementing. He serves as co-chairman on the Drilling Technology session of the "Annual Deepwater Technical Symposium" and is an active member of SPE and AADE.

Please join me in welcoming Ronnie to his new role in helping us direct Technology and improving our ability to deliver service quality to our customers.
