Subject: Release of Data

All

Mr. John Lebleu made a special request through our group to have a digital time based file with drilling data sent on a daily basis. This file is similar to the depth based file that we post every 12 hours in the wellspace dropbox. I was not out here when the request was made, but I always instruct my crew that before we release any data to any team member (BP or other) I need to have approval from our Drilling or G&G group. We have no problems sending this file to Mr. Lebleu, but I think that before any data is ever released to someone that we don't normally send data to on a regular basis it should be discussed with you gentlemen first. You guys can then make the request from us and we will know that it has gone through the proper channels and we have express permission to release said data.

I am sure everything is ok with sending this file, but I just need to get the go ahead from you gentlemen.

Thanks so much for your time.

Respect and regards,

Kell
