Subject: RE: Disposal
Importance: Normal

Doyle I will need the following information to determine how to characterize the waste see where it will go for disposal

Whose waste is it Bp or other ?

What is the total quantity and what is it contained in (i.e. 300 bbls in 7 x 25 bbl cuttings boxes etc.)

How was it used (i.e. not used, used downhole, circulated through mud pits, contaminated by xxx etc.)

What is in it, include all MSDS (30 % water, 20 % xxx, > 1% xxx, 5% xxx, 24% xxx)

What will it be brought to shore ?

Is there any chance this pill can be held for later use or used at another rig site ?
