

NORMAN WONG'S  
NOTES

3 May 2010

Telephone Interview Earl Lee

- On Horizon since Aug 2009, 42 years experience
- No knowledge of leaks on BOP surface or subsea.
- Not aware of having to run BOP hydraulic system.
- Not aware of any problems/deficiencies with BOP
- Unlatched LHRP for humane IDA, did EDS then  
and performed OK ~~Sept 2009~~ Nov 2009
- No problems to latch back up
- No photographs of BOP Control Panel or rig floor
- EDS functions are at Bridge and Drillers Cabin on the  
BOP control panel
- Does not know if the rig has EDS 1, 2 or 3
- Has seen diverter operated, does not know how the  
line up is on the diverter
- Has not seen ROV use the hot stab on the Horizon
- Use the digital machine to perform BOP pressure test
- New BOP rubbers installed prior to the well
- No aware of third party assurance for BOP inspections
- Have not performed a Negative test on the Horizon
- Would expect if he performed a negative test he would  
be in charge and the plan would be agreed ~~with~~ on  
the THIN plan
- Never heard of the "bladder effect" or "annular  
compression".
