Subject: LCM order in the event of losses.
Attachments: EXAMPLE FOR LOSS SHEET (2).xls

I have calculated some numbers for LCM for the next section (8.5x9.875) and Gordon can correct me if I have made any errors. On board now we have enough conventional LCM to mix 400 bbls of the 84 ppb Emergency pill. We have enough FAS AK with all components to mix 600 bbls of 14.7 ppg at 155 degrees. We have enough FAS material to mix and pump 273 bbls. We have put together LCM order in the event we experience losses we can order this material. I am working with warehouse to replenish this order when and if we have to get this out. The material order will give the materials needed to mix and pump 800 bbls of the Emergency LCM pill and 275 bbls of the FAS. I have discussed with Gordon and we do not think it necessary to order any more FAS AK as we have enough to mix and pump 3 x 200 bbls pills and we will be limited by the volume we can pump based on depth and temperature. This will be reviewed and added to the document we are working on.

Regards

Maxie
