Subject: Athens Subsurface Conference June 14-16  
Importance: Normal

Hi Jay

Hope all well.

Mike asked me to pull together the Exploration Division input for the Athens Conference. There a 3 Break-out Sessions planned for Exploration this year - we'd like to ask if you be willing to lead one session on Deepwater Exploration?

I know you were up for one last year - clearly post Macondo the flavour would be a lot different; there are a number of themes that spring to mind...importance of deepwater to BP and industry as a source of hydrocarbons, post Macono response and getting back to drilling, technology (inc. 20K stack), examples of GoM portfolio etc.

Do you have time to discuss on phone one morning this week your time?

Regards

Howard
