Subject: RE: Safety Pulse Check Update
Importance: Normal

Horizon:

Questionnaires have been filled out and a set of more pointed questions/topics has been developed. We are going to be conducting interviews and small group discussions on the rig on Wednesday and Thursday of this week. Next week, Ian Little, John Guide, Jake Skelton, Dave Rainey?, et al, will be going to the rig on March 27-28 to deliver the findings and rollout actions based on all the feedback.

Subject: Safety Pulse Check Update

I will be providing Neil and his LT an update on the status of the Safety Pulse Checks on Tuesday of next week. Please provide me your status and any feedback you have received. I plan to take this feedback and develop a view of the common issues across the GoM. Please provide your status and report by end of this week.

Thanks!
