Is the \$165M NTE OK?

Gene, we need to keep the NTE (not to exceed) at or below \$165m. Going above this would need SET approval. Don't want to do that.

Thanks,

Jay

Just wanted to emphasize the urgency of this request. We are at \$116m of actual spend. Our AFEs to co owners is approved for \$124m and we need to give them 48 hours for any supplement approval. We need to get the AFE out to our partners so that we are not exposed if the spend goes over \$124m.

*Thanks!
Samina*

Gene,

Could you get started on this and gather needed info for the document (Samina highlighted in yellow).

Thanks,

Jay

Importance: High

Jay,

We need to get a supplement FM together for Macondo ASAP. I have started a draft with placeholders. Do you want me to ask Bryan to help me with this request?

The current estimate for NTE request puts the capital request over \$100m, which requires Andy to approve the FM.

Please let me know if you have any questions. Thanks!

Samina
