Marshall/Stan: This request has been outstanding for a week and the team has asked me to follow-up and inquire when we can expect a response. Please advise at your earliest opportunity.
Thanks, JLL

Marshall

Here's an additional request for information from the Incident Investigation Team concerning risk management processes relating to the Macondo well:

All documents in support of DWOP 3.4 Risk Management process pertaining to the Macondo well. This should include BP Risk Assessment Tool (RAT) for documenting and managing D&C risk for this exploration well and/or any Excel based "Common Process Risk Register" that may have been utilized.

Best regards,
James Lucari
Managing Attorney

Marshall,

Please find attached the risk register for Macondo. E&A was not using the RAT when this well was planned.

Please let me know if you need anything else.

Thanks,

David
