Ewen,

Is this why you think the batteries are supposed to be replaced every year?

Chris

Billy looking at the recommended replacement interval do you understand what "One year of on-time maintenance means"? It's not clear to me when these batteries should be replaced.

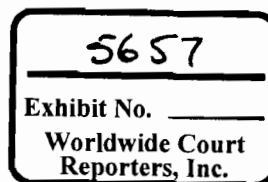

It is recommended that the 9VDC and 27VDC battery packs be replaced after:
One year of on-time operation.
When the number of actuations has been exceeded for that year (33).
Five years after date of purchase.
Whichever of the above events happens first

James,

Please see the attachment. I think this will answer some of your questions.
