Mike please send us your tracking sheet. Robert LC Eldridge can quote the replacements. We did this on the Nautilus a few years back I think that's who we used then.

Good morning Robert,
We are getting ready to do the monthly fire damper PM today. I will wait for the results of that, and also talk to Dave to get a list made up for you.

The short answer is; all of them. Because of the design that utilizes the louvers, it is mechanically complex and prone to malfunction. We often spend days fixing one, just to have it malfunction during the next month's test.

Dave/Mike

Could you give me a list of dampers that need to be replaced? As well as the sizes of them, looking to send someone out to do a replacement survey.
