Question By	Tollison, Chris (DWH Proj)
Category	T
Investigation Title	AMF Testing Onboard DWH
Team Lead	Farr, Dan (Houston)
Assigned To	Tiano, Robert (Houston)
Associated Root Cause Diagram Ref.	
Area of Investigation	Has the AMF ever been tested? What are Transocean's requirements? "Mark Hay, not in 8 years."
Investigation Actions	Went through all EMPAC, RMS and emails. I have also requested info from Cameron on the SEM over hauls .
Method of Investigation	Looked through all available docs and personal interviews.
Evidence / Doc. Support	Yes
Documents Used	emails for mike fry to rig.
Summary of Investigation	The AMF was tested at Cameron as far as the SEM's were concerned, but they were not tested as a complete unit using all parts from the SEM's to the ram. there is Cameron docs that support this but I am unable to link which SEM's were done at Cameron at which time due to there being no serial numbers used just part numbers and job numbers.
Findings	The AMF was tested at Cameron as far as the SEM's were concerned, but they were not tested as a complete unit using all parts from the SEM's to the ram.
Recommendations	There needs to be a yearly test of this system (after the batteries have been changed)
