Billy,

Cameron's meaning for "one year of on time operations" is 1 year from the time the batteries are installed in the SEM.

Let me know if you need anything else.

Thanks

Jason,

Can you answer the below question for James? He is needing a better understanding of this comment

Billy

Billy looking at the recommended replacement interval do you understand what "One year of on-time maintenance

CONFIDENTIAL

TRN-INV-02831523

TDR086-029223

TREX-36708

means"? It's not clear to me when these batteries should be replaced.

**It is recommended that the 9VDC and 27VDC battery packs be replaced after:  
One year of on-time operation.  
When the number of actuations has been exceeded for that year (33).  
Five years after date of purchase.  
Whichever of the above events happens first**

James,

Please see the attachment. I think this will answer some of your questions.
