Q. Now, you were saying before that you could tell from this -- the information provided with this graph -- and maybe I'm overstating it -- that the test was an accurate one. It wasn't an erroneous test, that in fact the shale was as hard as they're -- they're reading?

A. I don't personally see any evidence in this test that, if I were to interpret it, would tell me that this is an erroneous test."

Q. Or it could have been an erroneous test. Isn't that what he also says in here?

A. I believe the curves were looked at by a number of individuals, and we did not determine that it was an erroneous test.
