
David Trocquet

David Trocquet
MMS
District Manager of the
New Orleans District

Q. [A]nd I'll ask you in your personal status. What are your understandings of the safe drilling margins?

A. That there's a margin of the – the mud weight being greater than the – the pore pressure.

Q. Okay.

A. Then there's a safe margin of the – the – the fracture gradient of the last exposed shoe versus the – the mud weight.

Q. Okay. Any others?

A. No.
