**Subject:** Q's for if we run out of conversation at lunch.....

Now don't use these questions as a reason to cancel lunch on me!!!! I know where you park your car and can be a patient little stalker!

- What do you see as the biggest Deepwater risks and challenges? Inexperienced crews, APB, Lost circulation
- Are existing technologies & services adequate to overcome these challenges and mitigate these risks? NO
- What do you want service companies working on? Compressible clear fluids, LCM pills
- How could we best position ourselves to serve your existing and future needs? See above
- Going forward, how will service companies be chosen for existing & future projects? Using only prequalified vendors - by bidding
- What is your Deepwater strategy? Core long term production growth
- Could you provide any specific feedback on how Baker Hughes Drilling Fluids / Baker Hughes is meeting / not meeting your expectations? N/A
