Importance: Normal

You would have shot 64 at Augusta today

John, agree with standdown. Happy to take as much time as you think. 2 first aids and 2 drops in 2 weeks is worth a timeout.

John,

We had a first aid this afternoon with one of our Roustabouts. The crane crew was repairing crane block for inspection, the crane operator was lowering the main block into a holding stand so the block, pin and sheaves could be inspected. While the block was lowered into the stand the stand shifted to the left hitting the roustabout in the left leg. Roustabout reported to the Medic, an ice pack was applied for a short period of time. He returned to work.

Thanks, Murry
