VOLUME 1 JANUARY 24, 2013

Q. (BY MR. LI) And if BP didn't
tell you what its internal estimates of its
flow rates were, they would be withholding
from you material information, correct?
MR. BROCK: Object to the form.
A. What I remember them telling us
was that they wanted to proceed with the top
kill, that they were confident that it was
going to work, that and that they were
had the capability of marshalling counter
flows that would overwhelm what was coming
up.
