

# Deposition Transcript of Pat Campbell

ORAL AND VIDEOTAPED DEPOSITION OF:

**Patrick Joseph Campbell**

VOLUME 2

JULY 13, 2011

18 Q. Yesterday you also mentioned  
19 that during the peer assist on the top kill  
20 or the junk shot that several of the outside  
21 people brought in to provide their opinions  
22 did not think it was a good idea because the  
23 flow path was likely too large for the junk  
24 shot to work; is that right?

25 A. The short answer is yes.

1 Actually, the junk shot was in combination  
2 with a momentum kill. And the momentum kill  
3 in this instance required injection very near  
4 the surface, in other words, not via a long  
5 drill string or something of that nature.

6 So it was thought that the  
7 combination of the two elements, the size of  
8 the flow path and the nature of the technical  
9 limitations about a momentum kill -- your  
10 words were not a good idea. I think our  
11 words were, had a very low likelihood of  
12 success.
