Of course you guys doing the job can get the data, so list is approved. The purpose of the note was meant to put a limit on the people outside the circle of trust getting the data.

Sorry if it caused you any issues.

Jace,
I have forwarded it to Paul. I wrote that note to the pumping reps so that they know exactly one person who gets the data. BP can then worry about distribution. I am sure you can imagine how tight hole this is going to be.

Subject: BJ and Halli Data

Roland and Rupen,

Mark has requested that the following personnel have access to this data at the completion of the kill for analysis:

1. Mark Mazzella
2. Jace Larrison
3. David Strickland
4. Bob Grace
5. David Barnett

Please let me know where we get with this as soon as you can. Thanks.

Rupen

We will continue to load into PI and will provide NO data access to anyone and will wait for Paul Tooms to give approval for each users access.

Subject: Data Files from BP's Top Kill

Importance: High

Gentleman,

Just want to make it clear that **NO ONE** is to get the data files from the Top Kill method that is being pumped from yesterday or today except for Paul Toom's group. This order comes directly from Bill Kirton and Charles Holt. Any requests for this data has to go Paul Tooms.

I understand that the data from yesterday was provided to:

Doug Wood (BJ and HAL data provided for input into BP's ProcessNet PI software portal)

Kurt Mix (HAL data for analysis)

David Strickland (BJ data for analysis)

Roland Sauermann (HAL data provided for input into BP's ProcessNet PI software portal, this was assisting Doug Wood's request).

In case you are used for pumping cement off the Q4000, the same data sharing restrictions are valid for you as well.
