Subject: RE: Macondo PVC

David - I have spoken with Bob Merrill and have more context now around the question being asked. I will do some work using the better quality Na Kika area compressibility data that we have and will revise the predictions of compressibility. The initial response was more to do with what we measured on the Macondo RSWCs, which as you correctly point out have some inherent biases.

I should have something later today on this.

Steve

 FYI... I don't know if we will increase it. Steve and Bob are going to talk. I'm still chasing aquifer size.
