

Material Balance Analysis - Compressibility

Compressibility

- C_o = oil compressibility of 14.3 microsips derived from BP documents
- C_w = water compressibility of 3 microsips derived from BP documents
- C_f = formation compressibility of 12 microsips; also known as C_r
 - Derived from numerous BP memos, internal emails and attached data
 - Confirmed by testimony of Dr. Paul Hsieh
