

Step Two: Select Buildups

- **Confirm general consistency among buildups**
 - Use log-log plot
- **Identify buildups appropriate for analysis**
 - Use semi-log plot
 - Look for buildups at level of pretest with realistic shape

Difference from Dr. Gringarten

- **Dr. Gringarten: Used only low-rate pretest**
- **Dr. Larsen: Used both low-rate pretest and high-rate buildups**

M56D Layer: All Buildups
