## What is a Microsip?

---

- Unit of measure for compressibility of material
- Term widely used in the petroleum industry
- What 1 microsip means: application of 1 psi of pressure to material causes its volume to change by 1 part in a million
- Often see:
  - msips
  - $\mu$ sips
  - $\times 10^{-6} \text{ psi}^{-1}$
  - E-06  $\text{psi}^{-1}$
