Yun

Thanks for the fdb file. Please note that I am using PVTsim18. I believe Farah also has this version.

From our telephone discussion, the following items need to be addressed to improve the OLGA well model. In the interest of getting this model over to you now that I have an internet connection I have not done these changes but I have indicated which items I have done ...

- Inflow PI set at 50 bbl/d/psi (not done yet, set at 10)
