

HARM TO BEACHES

👁 Nature of oiling

- Blankets of mousse, tarballs, submerged oil mats, buried oil

👁 Scope and duration

- At least 560 miles oiled
- At least 170 miles were moderately or heavily oiled
- As of June 2013, over 200 miles of beach were still oiled
- Re-oiling continues

👁 Ecosystem consequences

- Physical effects of clean-up activities
- Critical habitats impacted
- Full effects not yet determined
