

... views have not been successfully defined several opportunities and approval skills. Several operating partners have...  
 ... responsibility's approach OPA to work guidance and advice on issues (M) HSE performance and availability of...  
 ... operations in the energy, security and driving safety. This is an opportunity to gain valuable HSE information for...  
 ... operating partner to try and ensure HSE excellence.

**Conclusion**

As stated previously, it is not always clear exactly what responsibilities and duties a NOP company has under criminal and civil law, but what is clear is that NOP companies can play a significant role in the development of HSE excellence in any project regardless of the size of their investment. A close working relationship, with open two way dialogue and commitment on both (all) sides has been proven to add significant HSE value to on-going oil and gas developments. NOPs should embrace the possibilities to work as part of a partnership team.

Activity Specific HSE Management Objectives	Priority	Key Required Actions
