

MARINE MAMMAL GROSS NECROPSY LONG FORM

ACCESSION #: <u>SMM-2011023-LADD</u>	NECROPSY DATE: <u>3/15/2011</u>
NAME: <u>MC252</u>	PROSECTOR(S): <u>Gulian, Barbieri, Rust</u>

- > Circle one: "N" = normal; "A" = abnormal; "U" = unsure; "NE" = not examined"; "NA" = not applicable
- > Complete required fields of "Content"; "Life History"; "Congenital", and "Parasites"
- > Describe "abnormal" or "unsure" findings
- > Describe as if to a blind person, without interpretation. Any interpretation / questions can be placed in parenthesis.
- > Consider: (1) lesion, (2) location within the body and symmetry; (3) distribution within the organ, (4) relationship to other organs/lesions, (5) approximate percent of organ affected/ severity, (6) amount/size/size range, (7) degree of demarcation, (8) shape/structure, (9) texture/consistency, (10) homogeneity, (11) color & odor

HAIR-COAT AND INTEGUMENT: N / (A) / U / NE / NA

LIFE HISTORY: Lanugo/ Blackcoat (part./complete); Molt (part./complete); Guard Hair loss; Hair Coat not developed

DEVELOPMENTAL (FETAL) CHARACTERISTICS: (Circle if present) Eyebrows, Muzzle whiskers, Chin whiskers, Nails, Fetal folds, Other notations: _____

Finding: Ectoparasites (mite, lice, barnacle, tick) (<10, 10-20, 20-50, >50), Discolored, Patchy, Alopecia, Surgical incision, Penetrating wound, Foreign body, Laceration / Rake-marks, Abrasion, Erosion / Ulcer, Scar, Vesicle / Pustule, Plaque, Abnormal foci, Mass, Abscess, Cyst (fluid filled / empty), Fluid (edema) (Scavenging), Bruising (Hemorrhage, Petechia)

Description & Comments:

3 circular areas right flank ~ 20cm dia with regular margins that blubber & skin, intestines & (2) kidney protruding; fragment R 5/9th rib protruding

DISCHARGES: (Absent), circle and describe if Present:

OCULAR, NASAL, AURICULAR, ORAL, PENILE/ VULVAR, ANAL, OTHER: _____

Note Color and Consistency: _____

UMBILICUS: Present (Absent) N / A / U / NE / NA

LIFE HISTORY: Umbilical stump: Patent (partly / completely), Closed, Moist / Dry; Length: _____

Falciform ligament (umbilical vein)/ Umb arteries: Patent (partly / completely), Closed

Urachal ligament (urachus): Patent (partly / completely), Closed

Finding: Hernia (of: _____), Discharge, Discolored, Swollen / Thickened, Erosion / Ulcer, Scar, Vesicle/ Pustule, Abnormal foci, Mass, Fluid (edema), Other: _____

Description & Comments:

BLUBBER: (N) / A / U / NE / NA

Finding: Parasites (<10, 10-20, 20-50, >50), Discolored, Penetrating wound, Laceration, Abrasion, Abnormal foci, Mass, Abscess, Cyst (fluid filled / empty), Fluid (edema), (Scavenging), Bruising (Hemorrhage, Petechia), Necrotic fat

Description & Comments:

(2) SAC 350 ORANGE

SKELETAL MUSCLE: N / (A) / U / NE / NA

Finding: Atrophy, Tear (partial / complete), Pale / Discolored/ Streaked, Abnormal foci, (Edema), (Hematoma), (Hemorrhage), Mass, Abscess, Parasite (<10, 10-20, 20-50, >50), Other: _____

Extent: Tracking along fascia; Communicates with skin / blubber / bone / internal cavity

Description & Comments:

Bruising ~ 5cm square area around pharynx
Bruising around base of skull

EYES: (Right) N (A) U / NE Left: (N) A / U / NE

Finding: Missing; Phthisis (shrunken); Buophthalmia (enlarged); Proptosis (out of socket); Desmetocoel (bulged); Rupture; Lens luxation; Anterior synechia; Material in anterior chamber (behind cornea); Foreign body; Corneal Opacity; Cataract; Conjunctivitis; Penetrating wound; Laceration; Abrasion; Erosion / Ulcer; Scar; Other: _____

Location: Conjunctiva; Third eyelid; Cornea; Anterior chamber; Lens; Entire globe; Periorbital soft tissue

Description & Comments: soft tissue around eye scarred

ORAL CAVITY AND NASOPHARYNX: (N) / A / U / NE / NA

TEETH: unerupted, Just erupting, (Fully erupted), Canine vs. Incisor length: >, =, < Color: Black; Brown; (White)

Finding: Missing; Broken/ Fractured; Worn (regular / irregular); Tartar / Plaque; Gingivitis; Discharge

MUCOUS MEMBRANES; Color: Red, (Pink) Pale pink, White, Yellow, Blue, Other: _____

TONSILS; Color: _____, Enlarged/ Discharge/ Other: _____

PARASITES: Nasal mites (long / fat type; <10, 10-20, 20-50, >50); Other (<10, 10-20, 20-50, >50) _____

Other Findings: Laceration, Abrasion, Erosion / Ulcer, Scar, Vesicle / Pustule, Plaque, Abnormal foci, Mass, Abscess

Location: Lips (Upper / Lower); Tongue; Mucosa (Gumline / Bucal / Roof / Floor of mouth); Pharynx; Larynx

Description & Comments: _____

THORACIC CAVITY: (N) / A / U / NE / NA

Pericardial fat: Abundant, Fair amount, Reduced amount, (None); Serous (gelatinous) change

Effusion: Slight, Moderate, Copious (approximate amt: _____ ml)
Liquid, Serous, Viscous, Clear, Opaque, Purulent, Flecks, Fibrin (stringy); COLOR: _____

Finding: Pneumothorax (communication with skin / abdomen), Penetrating wound, Foreign body, Adhesions (to lung, diaphragm, pericardium, other: _____), Discolored, Plaque; Abnormal foci, Mass

Description & Comments: _____

SALIVARY GLANDS: (N) / A / U / NE / NA

Finding: Swollen, Discolored, Abnormal foci, Mass, Abscess, Other: _____

Description & Comments: _____

CRANIAL LYMPH NODES:	Mandibular: (N) / A / U / NE / NA
Retropharyngeal: (N) / A / U / NE / NA	Cervical: N / A / U / NE / NA
Axillary: N / A / U / NE / NA	Sternal: N / A / U / NE / NA
Mediastinal: N / A / U / NE / NA	Tracheobronchial: N / A / U / NE / NA

Finding: Swollen (slight, moderate, marked), Discolored, Lymphoid hyperplasia (regular demarcated white foci, Abnormal foci, Mass, Abscess, Wet / Fluid (edema), Other: _____

Description & Comments: _____

ESOPHAGUS: (N) / A / U / NE / NA

CONTENT (AMOUNT / DESCRIBE): empty, formula, fish, digesta, mucous, other: _____

Finding: Discolored, Penetrating wound, Foreign body, Erosion / Ulcer, Perforation, Proliferation, Thickened, Plaque, Abnormal foci, Mass, Dilated / Constriction, Obstruction, Parasites (<10, 10-20, 20-50, >50)

Location: Cervical (extra-thoracic), Thoracic, Lumen, Mucosa, Submucosa, Wall, Serosa (outer surface)

Description & Comments: _____

ACCESSION #

NAME:

MC 252

THYROID: Right: (N) / A / U / NE / NA

Left: (N) / A / U / NE / NA

Finding: Enlarged, Discolored/ Pale, Abnormal foci, Mass, Cyst (fluid filled / empty), Other:

Location Left, Right; Symmetrical, Asymmetrical (R > L, L > R)

Description & Comments:

THYMUS: N / A / U / (NE) / NA

LIFE HISTORY: Involution, Prominent, Apparent

Finding: Atrophy, Hypertrophy, Discolored, Abnormal foci, Mass, Cyst (fluid filled / empty), Other:

Description & Comments:

TRACHEA / BRONCHI / LUNGS: (N) / A / U / NE / NA

CONTENT (AMOUNT / DESCRIBE): Foam / Mucous / Blood / Pus / Digesta / Other:

Clear, Opaque; Color: ; Other:

PARASITES: Parafilaroides (ND, 1+, 2+, 3+, 4+, 5+) / Otostrongylus (ND, <10, 10-20, 10-50, >50)

Finding: Discolored/ Pale, Abnormal foci, Mass, Dilation / Constriction, Depressed/ Collapsed / Consolidated, Congested, Expanded, Emphysema (air bubbles) / Bulla (air filled cyst), Clear foamy fluid/ Edema (small / lg airway / septa; slight, mod, copious), Infarct (pale / red / red margins), Thrombus (part / complete vessel occlusion; w/infarct), Abscess, Obstruction, Proliferation

Location: Trachea (cervical, thoracic), Bronchus, Lobe: R cranial, (R middle), R caudal / L cranial / L caudal / All lobes

Dorsal / Hilar, Ventral / Cranioventral, Mid / All regions, Pleura, Parenchyma, Interlobular (space between lobules)

Description & Comments:

consolidated which masses 1-3 cm diameter in periphery of (R) lung. margin (-potentially a freezing artefact)

HEART / PULMONARY ARTERIES / AORTA :

(N) / A / U / NE / NA

(DO NOT FORGET TO RECORD HEART WEIGHT AND WALL THICKNESS' ON SHORT FORM IF MEASURED)

PARASITES: Otostrongylus/ Other: (<10, 10-20, 20-50, >50)

CONGENITAL: Ductus arteriosus: Patent, Membrane covered but probe patent, (Closed)

Foramen ovale: patent, probe patent but covered by membrane, (closed)

Persistent left aortic arch: with esophageal dilation, without esophageal dilation

Atrial / Ventricular septal defect (diameter defect: ; diameter outflow tract:)

Aortic / Pulmonic Constriction (valvular, above valve, below valve) (with post-constriction dilation)

Pericardium: Effusion: Slight, Moderate, Copious (approximate amt: ml); COLOR:

Liquid, Serous, Viscous, Clear, Opaque, Purulent, Flecks, Fibrin (stringy)

Finding: Discolored., Rupture, Proliferation, Thickened, Plaque, Abnormal foci, Mass, Other:

Valves: Smooth thickening (nodular / diffuse), Roughened thickening (flat / proliferative)

Left AV valve, Aortic valve, Right AV valve, Pulmonic valve

Plaques on atrium / vessel inner surface above valvular lesion (mild, moderate, severe)

Epicardium, myocardium, endocardium: Finding: Dilation (ventricle L/ R; atrium L/ R), Wall thin / thick (ventricle L/ R; atrium L/ R), Left Side Flaccid, Infarct (pale / red / red margins), Thrombus (part / complete occlusion), Roughened inner surface, Pale / Discolored, Abnormal foci, Mass, Abscess, Other:

Description & Comments:

NO abnormalities seen

ABDOMINAL CAVITY: (N) / A / U / NE / NA

Abdominal fat (Perirenal, Omental): Abundant, Fair amount, Reduced amount, (None), Serous (gelatinous) change

Effusion: Slight, Moderate, Copious (approximate amt: _____ ml)

Liquid, Serous, Viscous, Clear, Opaque, Purulent, Flecks, Fibrin (stringy); COLOR: _____

Finding: Pneumoabdomen (communication with skin / thorax), (Penetrating wound), Foreign body / Ingesta (with or without GI rupture), Adhesions (to wall / organs: _____), Discolored, Plaque, Abnormal foci, Mass, Abscess,

Location: Peritoneum, Mesentery, Omentum

Description & Comments: _____

LIVER: (N) / A / U / NE / NA

PARASITES: Flukes / Other: _____ (ND, 1+, 2+, 3+, 4+, 5+ or <10, 10-20, 20-50, >50)

Finding: Enlarged (slight, moderate, marked), Small, Capsular fibrosis, Fracture / Laceration, Discolored / Pale, Nutmeg appearance, Abnormal foci, Mass, Abscess, Cyst, Friable, Congested, Other: _____

Location: Lobe: Caudate / Right lateral / Right medial / Quadrate / Left medial / Left lateral / All lobes

Capsule, Subcapsular, Parenchyma

Description & Comments: _____

GALL BLADDER, BILE DUCT, PANCREATODUODENAL DUCT: N / A / U / NE / NA

PARASITES: Flukes / Other: _____ (ND, 1+, 2+, 3+, 4+, 5+ or <10, 10-20, 20-50, >50)

CONTENT: Patent, Obstructed (by _____), Distended, Partly full, Empty

Bile: Liquid, Viscous, Inspisated, Gritty, Calculi (SAVE), Green (dark / light), Yellow, Orange, Black

Finding: Discolored, Ulcer / Erosion, Proliferation; Thickened, Plaque, Abnormal foci, Mass, Cyst, Dilated / Constricted,

Description & Comments: _____

SPLEEN: (N) / A / U / NE / NA

Finding: Engorged (slight, moderate, marked), Contracted, Fragments of (satellite) spleen, Capsular fibrosis / siderotic plaque, Lymphoid hyperplasia (regular discrete small white foci), Infarct (red / pale / red margin). Discolored / Mottled, Abnormal foci, Mass, Friable, Other: _____

Location: Head, Body, Tail, Capsule, Subcapsular, Parenchyma **Color:** _____

Description & Comments: _____

PANCREAS: N / A / U / (NE) / NA

Finding: Loss of lobulation / Swollen, Small, Discolored / Pale, Abnormal foci, Mass, Other: _____

Location: Left arm of pancreas, Right arm of pancreas (against duodenum); L / R; Symmetrical, Asymmetrical (R>L, L>R)

Description & Comments: _____

STOMACH: N / A / U / (NE) / NA

TIED OFF COLLECTED WHOLE

STOMACH CONTENTS (AMOUNT / DESCRIBE / FUNDIC VS PYLORIC): Empty, Dilated w/ gas, Mucous, Formula, Fluid, Sand/ Rocks, Fish, Cephalopods, Foreign bodies, Undigested, (Partially digested), Digested, Other: _____

PARASITES: Nematodes: (<10, 10-20, 20-50, >50) with or without volcanic ulcer (mild, moderate, severe)

Other: _____ (<10, 10-20, 20-50, >50)

Finding: Discolored / Pale, Penetrating wound, Foreign body, Rugae swollen / loss / thickened, Erosion / Ulcer / Volcanic ulcer, Perforation, Thickened, Plaque, Abnormal foci, Mass, Dilated / Constricted, Torsion, Obstruction

Location: Fundic / Pyloric / Non-glandular / Duod Ampulla; Lumen, Mucosa, Submucosa, Wall, Serosa (outer surface)

Description & Comments: _____

SESSION #

NAME:

SMALL INTESTINE: (N) / A / U / NE / NA

CONTENT (AMOUNT / DESCRIBE): Empty, (Digesta) Frank blood, Digested blood, Fluid, Other: _____

PARASITES: Type: _____ (<10, 10-20, 20-50, >50 or 1+, 2+, 3+, 4+)

Finding: Discolored/ Pale/ Injected, Penetrating wound, Foreign body, Rugae swollen / loss / thickened, Erosion / Ulcer, Perforation, Thickened, Plaque, Abnormal foci, Mass, Dilated / Constricted, Torsion, Corrugated, Obstructed

Location: Duodenum, Jejunum, Ileum; Lumen, Mucosa, Submucosa, Wall, Serosa (outer surface)

Description & Comments:

Small amount
- protruding from skin at scaphoid site

LARGE INTESTINE: Cecum: N / A / U / (NE) / NA; Colon: (N) / A / U / NE / NA

CONTENT (AMOUNT / DESCRIBE): Empty, (Feces) Normal (firm), (thin/pasty), dry, tarry, meconium present
Other: _____

PARASITES: Type: _____ (<10, 10-20, 20-50, >50 or 1+, 2+, 3+, 4+)

Finding: Discolored/ Pale; Penetrating wound, Foreign body, Rugae swollen / loss / thickened, Erosion / Ulcer, Perforation, Thickened, Plaque, Abnormal foci, Mass, Dilated / Constriction, Obstruction (by _____)

Location: Lumen, Mucosa, Submucosa, Wall, Serosa (outer surface)

Description & Comments:

ABDOMINAL LYMPH NODES: Gastric: N / A / U / (NE) / NA; Mesenteric: N / A / U / (NE) / NA;
Renal: N / A / U / (NE) / NA; Iliac: N / A / U / (NE) / NA; Inguinal: N / A / U / (NE) / NA;

Finding: Swollen (slight, moderate, marked), Discolored/ Pale, Lymphoid hyperplasia (regular demarcated white foci), Abnormal foci, Mass, Abscess, Wet / Fluid (edematous), Other: _____

Location: Left, Right, Symmetrical, Asymmetrical (R>L, L>R), Cortex, Medulla, Corticomedullary junction

Description & Comments:

ADRENAL GLAND: Right: N / A / U / (NE) / NA Left: N / A / U / (NE) / NA

CORTICOMEDULLARY RATIO: Right: _____ Left: _____

Finding: Enlarged/ Shrunken (slight, moderate, marked), Nodular cortical hyperplasia (mild, moderate, severe), Discolored / Pale, Abnormal foci, Mass, Abscess, Hemorrhagic, Striated

Location: Cortex, Medulla, Corticomedullary junction; Left, Right; Symmetrical, Asymmetrical (R>L, L>R)

Description & Comments:

URINARY BLADDER and URETERS: (N) / A / U / NE / NA

BLADDER CONTENT: Patent, Obstructed (by _____) Distended, Partly full, Empty;

Urine: Clear, Opaque, Yellow (dark / light), (Red-tinged) Other: Gritty, Calculi (SAVE)

Findings: Discolored/ Pale, Erosion / Ulcer, Dilated / Constricted, Rupture, Proliferation, Thickened, Plaque, Abnormal foci, Mass, Abscess, Cyst (fluid filled / empty), Hydroureter, Calculi (SAVE)

Location: Bladder: Apex (tip), Body, Trigone (outflow site) / Ureter; Lumen, Mucosa, Submucosa, Wall, Serosa

Description & Comments:

KIDNEY: Right: (N) / A / U / NE / NA

Left: (N) / A / U / NE / NA

Finding: Swollen / Shrunken (slight, moderate, marked), Hydronephrosis (distended pelvis), Loss of corticomedullary/renicular differentiation (slight, moderate, marked), Discolored / Pale, Infarct (red / pale / red margin), Cyst (fluid filled / empty), Hematoma, Thickened, Plaque, Abnormal foci, Mass, Abscess, Other: _____

Location: Cortex, Medulla, CM junction, Capsule, Subcapsule, Cranial / Caudal Poles

Description & Comments: Frozen / Thawed

URETHRA: N / A / U / (NE) / NA

CONTENT: Patent, Obstructed (by _____) Gritty, Calculi (SAVE)

Finding: Discolored / Pale, Erosion / Ulcer, Dilated / Constricted, Thickened, Plaque, Abnormal foci, Mass, Abscess

Description & Comments: _____

MALE REPRODUCTIVE TRACT: NA

Testes: N / A / U / NE

Scrotum: N / A / U / NE

Penis: N / A / U / NE

Prostate: N / A / U / NE

Prepuce: N / A / U / NE

LIFE HISTORY: Active (swollen), Resting, Immature Testes: Undescended (abdomen/ inguinal canal)

Finding: Enlarged, Discolored / Pale, Cyst (fluid filled / empty), Obstructed (by _____), Prolapse, Perforation, Swollen / Thickened, Fluid-filled, Erosion / Ulcer, Plaque, Abnormal foci, Mass, Torsion, Laceration / Abrasion, Vesicle / Pustule, Fractured baculum, Hernia, Other: _____

Location: Testes; Epididymus (head / tail), Scrotum, Prostate, Penis, Prepuce;

Left, Right, Symmetrical, Asymmetrical (R > L, L > R); Skin, Subcutis, Sac, Mucosa, Submucosa

Description & Comments: _____

FEMALE REPRODUCTIVE TRACT: (make new form for Fetus): NA

Ovaries: (N) / A / U / NE

Uterus: (N) / A / U / NE

Cervix: (N) / A / U / NE

Vagina: (N) / A / U / NE

Vulva: (N) / A / U / NE

LIFE HISTORY: Left: Ovary: Corpora lutea (No. none), Corpora hemorrhagic (No. none), Follicles (No. _____)

Right Ovary: Corpora lutea (No. _____), Corpora hemorrhagic (No. _____), Follicles (No. _____)

Uterus: Placental scar (L / R uterine horn; No. none)

Fetus Present: (L / R uterine horn; Fetus Acc#: none)

Placenta: Attached / unattached to fetus; Complete placenta / Part of: chorioallantois, amnion, umbilical stalk; Umbilical Stalk No. of Twist: _____

MAMMARY GLANDS/ NIPPLES: MAMMAE: Lactation, Swollen without lactation, Non-lactating

Finding: Enlarged, Discolored / Pale, Abnormal foci, Mass, Cyst (fluid filled / empty), Obstructed (by _____), Prolapse, Rupture, Perforation, Swollen / Thickened, Fluid-filled, Erosion / Ulcer, Plaque, Abnormal foci, Mass, Torsion,

Location: Ovary, Uterus, Cervix, Vagina, Vulva; Left, Right, Symmetrical, Asymmetrical (R > L, L > R);

Capsule, Subcapsule, Parenchyma, Hilus, Lumen, Mucosa, Submucosa, Wall, Serosa (outer surface);

Fetal attachment site, Non-attachment site, Chorioallantois, Amnionic sac, Umbilical stalk

Description & Comments: scarred / absent / underdeveloped

CSF: (N) / A / U / NE / NA

CYTOLOGY: Yes / No

Where examined: _____

Finding: Increased amount of CSF, Discolored, Other: _____

Description & Comments: _____

CESSION # _____ NAME: _____

DURA MATER AND INSIDE CALVARIUM: N / A / U / NE / NA

Finding: Discolored/ Pale, Congestion, Penetrating wound, Foreign body, Abnormal foci, Mass, Abscess, Hematoma, Fluid,

Location: Subleptomeningeal, Dura mater, Inside skull

Level of cerebrum / cerebellum / brainstem; Dorsal, Lateral, Ventral; L / R; Symmetrical, Asymmetrical (R>L, L>R)

Description & Comments:

BRAIN: Cerebrum: N / A / U / NE / NA; Cerebellum: N / A / U / NE / NA
Brain stem: N / A / U / NE / NA; Meninges: N / A / U / NE / NA

Finding: Discolored/ Pale, Asymmetry / Midline shift (towards L / R), Shallow sulci (grooves) / Flattened gyri (bumps), Congested, Edematous, Penetrating wound, Foreign body, Abnormal foci, Mass, Abscess, Hydrocephalus, Hematoma,

Location: Lobe: frontal / temporal / parietal / occipital; Dorsal, Lateral, Ventral; L / R; Symmetrical, Asymmetrical (R>L, L>R)

Description & Comments:

SCIATIC NERVE: N / A / U / (NE) / NA

Finding: Discolored, Tear (partial / complete), Abnormal foci, Mass, Other: _____

Description & Comments:

SPINAL CORD: (N) / A / U / NE / NA

Finding: Discolored, Disc herniation / Compressive lesion, Tear (partial / complete), Foreign body, Abnormal foci, Mass,

Location: Cervical, Thoracic, Lumbar, Sacral; Between bone and meninges/cord, Between meninges and cord, Parenchyma

Description & Comments:

SKELETON AND JOINTS: (N) A / U / NE / NA

Joint Effusion: Slight, Moderate, Copious (approximate amt: _____ ml); Liquid, Viscous, Clear, Opaque, Flecks, Fibrin (stringy); White, Yellow, Tan, Brown, Red, Red-tinged, Other: _____

Finding: Bone pliable / brittle, Deformity, Bone loss, Sequestrum (bony / other), Cyst (filled / empty),

Fracture (single / multiple breaks; sharp / rounded edges; open to surface; callus on outside / inside of bony surface),

Luxation / Dislocation, Mass, Abnormal foci, Fluid (edema), Foreign Body, Other: _____

Joint surface: discolored / roughened / pitted / erosion / ulcer / proliferative / degenerative disease

Location: Bone / Joint _____; Joint surface, space, capsule

Proximal, Middle, Distal 1/3rd of bone; Physis, Metaphysis, Diaphysis; Vertebral Body, Process

Bone surface (outside / inside); Bone Cortex (one / both); Bone marrow cavity

Associated soft tissue (tendon, ligament, muscle, other: _____)

Bone Marrow: NE, Present in femur / rib / sternbrae

Decreased / Lack, Soft, Red, Abundant (hyperplasia), Fatty, Replaced by tissue / mass

Description & Comments:

Fractured ribs (12) 8x9, assumed from scavenging

— bruising with slight edema + edema in pleura + muscle
of ventral neck

— protruding from wounds on (R) flank

(R) kidney

(R) hypaxial muscle

+ rib fragment (8th or 9th rib):

GI (intestines + mesentery)

liver

— bruising in muscle along dorsal neck (± 18 cm caudal to)
clavicle

— granulomatous mass in lung

— whitish solid masses 1-2 cm in diameter on (R) margin of lung

— bruising / bleeding at back of skull (photo taken)
