Re: MDL 2179 - 10-4536 Penalty Phase Document Production

Dear Judge Shushan:

In the course of responding to the Defendants' discovery requests in this matter, the United States has produced over 80,000 documents responsive to the requests and custodial file production obligations. Unfortunately, we have not fully met the final deadline for document production. The reasons for the delay in production include the fact that search terms were not finalized until April 27, 2014, giving just thirty days to collect, process, and review documents from five different federal agencies.

I attach three tables: Table 1 which sets forth the status of the United States' overall production; Table 2 which sets forth the status of the United States' production of NRDA data; and Table 3 which lists the United States' production statistics to date. I will continue to update these tables on a regular basis.

I apologize for our failure to fully complete the production as ordered and look forward to answering any questions or taking any remedial steps you direct at tomorrow's conference.

Respectfully submitted,

/s/ Sarah D. Himmelhoch

MDL 2179: Table 1
Status of United States' overall Penalty Phase Document Production
as of 5/28/2014

Type	No.	Text	Production Commitment	Production Complete?	Comments
Gen. Resp.	7	N/A	Review of documents withheld as "irrelevant" to identify any Penalty Phase Documents	No	Production complete except for documents withheld as privileged. See Gen. Resp. No. 8
Gen. Resp.	8	N/A	Review of documents withheld as deliberative process and determine whether the United States continues to assert the privilege over penalty phase documents	No	Production is complete except for approximately 10,000 documents which are undergoing secondary review for privilege. The United States will complete the review and provide its privilege log, declarations, or release the documents on or before June 17, 2014
RFP	1	Except to the extent such data has already been provided to Defendants, all data collected as part of, or in connection with, the Deepwater Horizon Natural Resource Damages Assessment including but not limited to all analytical data, unstructured data, raw data, unverified data, field notes, photographs, videos, survey responses, cooperative data, and independent data.	See "Status of NRDA Data" tab	Up to Date	See "Status of NRDA Data" tab. In addition, the parties still need to finalize a stipulation regarding their agreement that raw data will not be admitted or used absent good cause shown to the Court.
RFP	2	All documents, including but not limited to photos, aerial imagery, videos, or graphics, referring or relating to the areal extent, location, duration, thickness, and volume of Oil-Related Materials and/or Dispersants present at the surface of the water (including to a depth of one meter below the surface), including but not limited to all documents from the United States Department of Homeland Security sources.	A collection of photographs identified by NOAA	No	These photographs will be produced as part of the documents identified with the custodian beginning with "NOAA Hard Drive" and the Bates prefix "UPS_PP_NOHD." Production is expected to be complete by June 4, 2014.
			Aerial photographs in the custody of U.S. Customs and Border Protection	Yes	These documents were produced under the custodian names Appleby and Sutherland and included in the United States' second penalty phase production. Videos taken by CPB during the spill were delivered to the BP Operations/Logistics Deputy Planner in late May 2010.
			Aerial photographs in the custody of the National Aeronautics and Space Administration	Yes	The United States has identified no responsive documents.
			Aerial photographs in the custody of the Alabama National Guard	Yes	The four responsive documents were produced under the custodian name Alabama National Guard and contained in the United States' second penalty phase production bearing the Bates prefix "US_PP_DOD"
RFP	3	All documents referring or relating to the observation, collection, recovery, restoration, or rehabilitation of Wildlife during, or as part of, any Response Activities.	NOAA Status and Trends Data	Yes	These documents were produced under the custodian name "NOAA Status and Trends Program" and the Bates prefix "US_PP_NOAA" as part of the United States' second penalty phase production. In addition, NOAA provides a data portal from which long term data can be downloaded. There is 25 years of data for the Gulf of Mexico. Oyster tissue was sampled every year up until 1992, then every other year after that. Sediment was sampled every ten years. The portal can be found at: http://egisws02.nos.noaa.gov/nsandt/index.html#
			Custodial files of Barbara Schroeder, Lori Schwake	No	The United States has completed collection and processing of these documents and expects to produce documents not responsive to the privilege search terms on or before June 4, 2014. The United States will complete the privilege review and production of non-privileged documents on a rolling basis as soon as practicable and no later than June 17, 2014
			Documents identified as responsive while reviewing NOAA photo archive	No	These documents will be produced as part of the documents identified with the custodian beginning with "NOAA Hard Drive" and the Bates prefix "UPS_PP_NOHD." Production is expected to be complete by June 4, 2014.
			Custodial files of Dr. Michel and Dr. Child	No	Though not explicitly referred to in the United States' response to RFP 3, the United States has collected and searched the custodial files of Drs. Michel and Childs and expects to produce documents not responsive to the privilege search terms on or before June 4, 2014. The United States will complete the privilege review and production of non-privileged documents on a rolling basis as soon as practicable and no later than June 17, 2014.

MDL 2179: Table 1
Status of United States' overall Penalty Phase Document Production
as of 5/28/2014

Type	No.	Text	Production Commitment	Production Complete?	Comments
RFP	4	All documents referring or relating to any Mississippi River Diversions attempted, undertaken, discussed, or considered in connection with the Deepwater Horizon Incident and Spill, including all documents related to the effects or potential effects of any such Mississippi River Diversions.	Responsive documents collected but not produced during Phase 1 and Phase 2	No	Production is complete except for approximately 10,000 documents which are undergoing secondary review for privilege. The United States will complete the review and provide its privilege log, declarations, or release the documents on or before June 17, 2014
			ACOE Response to FOIA request from the State of Louisiana	Yes	Responsive documents were produced with the custodian name "USACE/State of LA FOIA Response" and the Bates prefix "US_PP_USACE" in the United States second penalty phase production.
			ACOE Documents Collected in Response to FOIA request from the State of Louisiana and withheld as privileged	No	The United States is reviewing approximately 5,731 documents collected by the ACOE in response to the FOIA request but withheld as privileged. These documents will be produced or identified on the United States' privilege log on or before June 17, 2014
			Custodial records of 15 ACOE custodians involved in analyzing the Mississippi River Diversions	No	The United States has collected and processed approximately 3,404 documents from the custodial files of these individuals. These documents will be produced or identified on the United States' privilege log on or before June 17, 2014
RFP	5	All documents referring or relating to any Fish Kills that resulted from (or were at any time suspected to have resulted from) the Deepwater Horizon Incident and Spill, including without limitation from Oil-Related Materials, Dispersants, and/or any Response Activities.	See RFP 1 and General Response 7-8	No	See RFP 1 and General Response 7-8
RFP	6	All documents referring or relating to the impact, lack of impact, and/or recovery of the Shoreline Environment from Oil-Related Materials, Dispersants, and/or any Response Activity.	Production of .75 terabytes of sonar data		The United States expects to produce this data on or before May 30, 2014
			GIS data found on the Seattle NOAA FTP site		The United States expects to produce this data on or before May 30, 2014
RFP	7	All documents referring or relating to any release or spill of oil in the Area of Response since April 2010 other than Oil-Related Materials resulting from the Deepwater Horizon Incident and Spill.	Results of search in the TIMS database	Yes	These documents were produced under the custodian name "TIMS Database" with the Bates prefix "US_PP_BSEE" and were included in the United States' second penalty phase production
			Results of search in the MISLE database	Yes	These documents were produced informally and will be produced formally under the custodian name "USCG MISLE Database" bearing the Bates prefix "US_PP_CGMSL" and included in the United States' third penalty phase production
RFP	8	All documents commending, praising, or otherwise noting the efforts of BPXP (including contractors and other entities assisting BPXP) and the Unified Command to respond to, or otherwise mitigate, minimize, or prevent any environmental, economic, human health, or other effects of the Deepwater Horizon Spill.	Documents in the Coast Guard Central Archives and custodial file of Roger Laferriere that are responsive to search string: "((("BP" OR "Deepwater Horizon") NEAR10 ("effective*" OR "efficient*" OR "prompt*" OR "quick*" OR "competent" OR "commend*" OR "excellent" OR "great" OR "well done" OR "nice*")))"	No	The United States has collected and processed documents responsive to this search string. The United States will produce documents not responsive to the privilege search terms on or before June 4, 2014. Documents that hit on the privilege search terms will be produced or identified on the United States' privilege log on or before June 17, 2014
RFP	9	All documents analyzing, evaluating, assessing, or discussing the nature, extent and degree of success of any efforts by Anadarko and any offers of assistance by Anadarko to assist after the Incident, including to minimize or mitigate the effects of the discharge with respect to the Incident and Spill.	Documents in the Coast Guard Central Archives and custodial file of Roger Laferriere that are responsive to search string: (Anadarko) W/15 (offer! or assist! or help! or participat! or respon! or minimiz! or mitigat! or clean! or control! or remov! or contain! or stop! or relief! or equip!))	No	The United States has collected and processed documents responsive to this search string. The United States will produce documents not responsive to the privilege search terms on or before June 4, 2014. Documents that hit on the privilege search terms will be produced or identified on the United States' privilege log on or before June 17, 2014

RFP	10	All documents referring or relating to the "BP Deepwater Horizon Oil Spill: Incident Specific Preparedness Review (ISPR);" the "On Scene Coordinator Report Deepwater Horizon Oil Spill;" and the reports and other work of the Operational Science Advisory Team, such as the "Summary Report for Sub-Sea and Sub-Surface Oil and Dispersant Detection: Sampling and Monitoring" (OSAT-1 Report), the "Summary Report for Fate and Effects of Remnant Oil in the Beach Environment" (OSAT-2 Report), the "Investigation of Recurring Residual Oil in Discrete Shoreline Areas in the Eastern Area of Responsibility" (the OSAT-3 Report), including but not limited to drafts, notes, communications, and outlines.	Documents in the Coast Guard Central Archives and custodial file of Roger Laferriere dated between April 20, 2010 and December 31, 2013 that are responsive to search string: ("Deepwater Horizon" OR "Deep water Horizon" OR "MC252" OR "DWH" OR "Mississippi Canyon Block 252") AND ("OSAT" OR "Coordinator" OR "OSC Report" OR ("operation%" NEAR5 ("advise%" NEAR5 "team")) OR ("residual" NEAR5 "oil") OR ("remnant" NEAR5 "oil"))	No	The United States has collected and processed documents responsive to this search string. The United States will produce documents not responsive to the privilege search terms on or before June 4, 2014. Documents that hit on the privilege search terms will be produced or identified on the United States' privilege log on or before June 17, 2014
RFP	11	All documents referring or relating to any analysis, assessment, evaluation, or study of the amount of Oil-Related Materials that was contained, collected, dispersed, burned, removed, or cleaned up in connection with Response Activities and/or any natural processes, including but not limited to documents relating to the preparation and publication of the "Oil Budget Calculator, Deepwater Horizon, Technical Documentation," and its appendices, dated November 2010, such as drafts, interview notes, communications, and outlines.	None	Yes	None
RFP	12	All documents referring or relating to the use or potential use of Corexit 9500, Corexit 9527, or other dispersant in connection with the Response Activities, including but not limited to all communications between or among the United States Coast Guard, the Unified Command, the Environmental Protection Agency, National Oceanic and Atmospheric Administration, and any other federal, state, or other governmental department, agency, entity, or body, or any representative or employee thereof, regarding the use (or limitations on use), safety, and/or effectiveness of Dispersants in connection with Response Activities	All documents in the custodial file of Mace Baron dated between April 20, 2010 and December 31, 2013 responsive to the search string: "Deepwater" OR "DWH" OR "Macondo" OR "Mississippi Canyon" OR "MC252" OR "Block 252" OR "GOM" OR "dispersant" OR "Corexit" OR "BP" OR "British Petroleum" OR "Moex" OR "Transocean" OR "Anadarko" OR "AEP" OR "APC" OR "AE&P" OR "GMBH" OR "Swaco" OR "Triton" OR "Halliburton" OR "Weatherford" OR "Cameron" OR "Drillquip"	Yes	Documents responsive to this search string were produced under the custodian name "Barron, Mace" and with the Bates prefix "US_PP_EPA" in the United States' second penalty phase production.
			All documents in the custodial file of Robin Conmy dated between February 1, 2011 and December 31, 2013 responsive to the search string: "Deepwater" OR "DWH" OR "Macondo" OR "Mississippi Canyon" OR "MC252" OR "Block 252" OR "GOM" OR "dispersant" OR "Corexit" OR "BP" OR "British Petroleum" OR "Moex" OR "Transocean" OR "Anadarko" OR "AEP" OR "APC" OR "AE&P" OR "GMBH" OR "Swaco" OR "Triton" OR "Halliburton" OR "Weatherford" OR "Cameron" OR "Drillquip"	Yes	Documents responsive to this search string were produced under the custodian name "Conmy, Robin" and with the Bates prefix "US_PP_EPA" in the United States' second penalty phase production.
RFP	13	All documents referring or relating to any analysis, evaluation, determination, or study of shoreline oiling, impact (including but not limited to any impact on the environment, human health, and Gulf Coast communities), monitoring, and cleanup in connection with the Deepwater Horizon Spill and/or Response Activities, including but not limited to documents relating to whether cleanup completion standards had been satisfied.	Daily reports generated by OSHA during the response	Yes	These documents were produced under the custodian name "OSHA Central Repository" bearing the Bates prefix "US_PP_DOL" in the United States' second penalty phase production
			Publicly available documents regarding the ongoing health study being conducted by NIOSH	Yes	These documents were produced under the custodian name "Sandler, Dale" with the Bates prefix "US_PP_HHS" in the United States' second penalty phase production

			Custodial file of John Howard	No	These documents have been collected and are currently being reviewed for privilege. Some documents have already been produced under the custodian name "Howard, John" with the Bates prefix "US_PP_HHS" in the United States' second penalty phase production. Because John Howard was not identified by counsel as a person with potentially responsive information until several weeks after the spill began, out of an abundance of caution, the United States has also collected the custodial files of Margaret Kitt and Frank Hearl, the two individuals Dr. Howard identified as likely to have any responsive emails he did not know to preserve at the outset of the spill.
RFP	14	All documents referring or relating to the economic impact of a Clean Water Act penalty on BPXP or on any other BP entity.	None	Yes	None
RFP	15	All documents supporting your contentions against BPXP with respect to the "history of prior violations" under the Clean Water Act.	EPA Suspension and Debarrment Administrative Record	Yes	These documents were produced under the custodian name "Pelletier, Robert" with the Bates prefix "US_PP_EPA" in the United States' first penalty phase production.
RFP	16	All documents supporting your contentions against BPXP and/or Anadarko with respect to the "other matters as justice may require" factor under the Clean Water Act.	BP's violations as recorded in BSEE files	Yes	Non-privileged documents related to prior INCs or other violations noted by BSEE were produced under the Bates prefix "US_PP_BSEE" and various custodian names in the United States' first penalty phase production.
			Data relating to royalties paid by BP and Anadarko for Gulf Region oil exploration and production	Yes	These documents were produced under the custodian name "Paul Knueven" and the Bates prefix "US_PP_DOI" in the United States' second penalty phase production.
			Reports prepared on behalf of BOEM	No	These documents have been collected and will be processed and produced as soon as practicable. We expect they will be produced on or before June 4, 2014.
RFP	17	All studies, evaluations, analyses or discussions of the impact of imposing penalties on non-culpable NOIs in oil and gas drilling operations, including but not limited to how imposition of such penalties would or might affect or relate to safety.	None	Yes	None
RFP	18	All documents reflecting policies, memoranda, or other guidance regarding the amount of penalties to impose or seek against non-culpable NOIs.	None	Yes	None
RFP	19	All documents reflecting the total royalties paid per annum to the United States from offshore leasing, and activities authorized thereunder, under the Outer Continental Shelf Lands Act and discussing any benefit from such royalties.	None	Yes	None
RFP	20	All studies, analysis, assessments, memoranda or guidance regarding the impacts on the national, regional, or local economies, national security or energy independence associated with offshore drilling.	Four internal DOE Reports	Yes	These documents have been produced under the custodian name "Office of Policy Analysis, Office of Policy & Int'l Affairs" and the Bates prefix "US_PP_DOE" in the United States' second penalty phase production.
RFP	21	All documents identified in the responses to the Interrogatories set forth below.	None	Yes	None
