Subject: ERA Summit Check-in
Importance: Normal

Nigel,

Sorry I cannot join your call this morning. Have a call with Angola at the same time.

I am in pretty good shape. I met with Pinky on Monday and we built a list of SS&W Linkages, Processes and Workflows. He also reviewed my list of SS&W Guidelines and added a few more there.

I am nearly finished with a case study of Macondo. It is a well currently drilling and is currently in a \$20 million or so NPT flat spot. I got their leak-offs, PP prediction, PP real-time data, lost circulation history, LWD time lapse log, etc. It will be a good case to give thought as to how ERA could impact one of those SS&W related NPT train wrecks.

Let me know if you need anything else from me.

Only other issue is transportation from the airport to Ascot. Warren and I are arriving on the same flight. Continental flight 34 arrives on Sunday, March 14th at 7:25 AM.

Mark
