

Daily Operations Report

WWCI Job Number: 2010-116

Customer Information

Customer	BP	Well Name	Macondo 252 # 1
Representatives	Mark Mazzella, John Shaughnessy		
Start Date	21-April-10	Report Date	26-April-10
WWCI Personnel	D. Barnett, R. Gomez, K. Girlinghouse, D. Moody D. Robichaux, C. Murphy, M. Cargol, S. Mossman, Jason Holvey		

Summary

Macondo 252 # 1 well blew out 22:00 hours 20 April 2010 and immediately ignited. Rig evacuated. Rig sank 10:15 hrs April 22nd 2010.

At report time: Well flowing from break in riser and DP.

Time	Details
00:00 – 02:30	Work details on containment dome and pump lifting equipment. Developed alternate surface intervention of the sub-sea stack. Flying ROV over BOP choke/kill line to check for access. ROV tightened leaking fitting.
02:30 – 04:30	Dye pumped into BOP w/ROV, leak at connection increased, 0 psi on gauge while pumping w/ROV.
04:30 – 07:00	Worked on PM 11, BOP Surface Intervention, PM 9 Rev. 1
07:00 – 19:00	WWCI personnel were split up into three teams to work on the RW Plan, Effluent Collection System and BOP Assurance Task Force/Capping Committee. Work was continued on PM 12 and PM 13- Capping Options.
19:00 – 24:00	A risk assessment matrix was completed on three RW intercept depth scenarios.
21:45 – 23:25	Operations to close the blind/shear rams using an ROV were performed but were not successful due to the inability to get more than 4,000 psi on the closing line. Had problems with the ROV pump. Require 4,600 psi to shear the 6 5/8" DP tube.
19:00 – 24:00	A risk assessment matrix was completed on three RW intercept depth scenarios.
