Lever to be near from the outsets that we will not use if ill the well accurate due to experience and the control of the american and and according to the sense of the se

BP's investigation into the cause of this accident is being led by a senior BP executive from outside the affected business. The team has more than 40 people. The investigation is ongoing and has not yet reached conclusions about incident cause. We intend to share the results of our findings so that our industry and our regulators can benefit from the lessons learned.
