Randy,

We would like to have 180 jts or 8,100 ft which ever is the closest. I appreciate your quick response on the matter.

Sincerely,  
James Ingram

James  
Just talked to John Hamilton and he said we can have it right now.  
I will get you a MMR for the pipe in a few days.  
Just let me know how many joints you are taking.

Thanks

Randy,

We are not using the 5 1/2" drill pipe. We have made the switch to 6 5/8" drill pipe now so the 5.5" drill pipe is available to you.

John,  
We are just checking to see if you are in a position to release the 5 1/2", 21.90 yet, we still have a need for it

Respectfully,

James,  
According to contract "exhibit B" the rig should maintain 22,000 feet of 5 1/2 21.90. We currently have 8000 feet on the rig and 4800 feet in town under various forms of repair, and if we get the 8100 feet to replace what was lost on Kodiak 1 we would only have a grand total of 20,500 feet for use—which is still short of the contractual amount. I would request that we consider supplementing our supply with at minimum, the amount to meet contract specifications as the lead time on new range 3 pipe is great, and this new pipe is readily available.

Respectfully,

FYI, Gents we need to make sure we are getting the new string. In addition we may want to make the used 5.5" string available for another rigs use.

**Subject:** 5.5" drill pipe

Graham,

Randy Davidson is in touch with the Horizon and has told them they can move on taking the 5.5" drill pipe. He will follow up with a MMR in two days to MMR it to the Horizon.
