

Drilling Summary For Last Hole Section (Continued)

4/4/2010 (Continued)

Drilled through main pay to 18,260 with 14.3 ppg mud.
Max downhole PWD =15.0 ppg; (Surface EMW=14.8 ppg)
Drilling rate slows and indicates bit or under-reamer is worn.
Began Weighting up to 14.4 ppg to pull out of hole.
Attempt Geo Tap at Probe depth of 18,232'; no success.

Lost returns when circulating at downhole PWD=14.9 ppg
(Surface EMW=14.6+ ppg);

Close BOP and pump 23 bbl of base oil down kill line;
Minimum downhole PWD=14.0 ppg (Surface EMW=13.8 ppg);
Open Annular for 3 min and lost 21 bbl; Close Annular and monitor well.
Total daily loss of 639 bbl to formation was indicated

Drill Through Main Pay Zone to 18,260'
with 14.3 ppg Mud
