- Q. And just to be clear, the safe drilling margin is tied to the result of the pressure integrity test, correct?
- A. **And the mud weight, yes.**
- Q. And the mud weight, correct?
- A. **Yes.**
- Q. And the result of the pressure integrity test is a fracture gradient measurement at a specific point, correct?
- A. **As if – it's formation integrity of the formation at – at the casing shoe.**
