Importance: Normal

Seems ok to me. I really don't think mms will approve deep surface plug. We'll see

Did permit look ok?

Subject: Negative Test

Recommendation out here is to displace to seawater at 8300' then set the cement plug. Does anyone have issues with this?

If we do a negative test prior to this with base oil to the wellhead the shoe will see about 360 psi less after the hole is displaced. Thoughts?

Thanks
Brian
