

Collection rates

- **Q4000**
 - Measured on two independent flow meters: Rotron and Vx
 - The meters were calibrated
 - The difference between the two meters (-300 to +500 STB/day)
- **Helix Producer 1**
 - Measured using a meter and in the tank
 - Meter has 1% uncertainty: ± 100 to ± 200 STB/day
 - Tank measurements are direct and very accurate
 - Used meter rates corrected to match tank volumes
- **Total uncertainty on collection rates: ± 600 STB/day**
