

7/31/10 Multi Team telecon

1/3

David Hays & Rob O'Connor for Washington

Marsha GOR charged on time, BP  
says typical 0.29 → more oil if time  
@4000, Enterprise

[Phineas] |

riser cut on Day 45

"does anyone want to put a number on log, fine" Steve W  
used 29% past, now 43-44%

1.35 x sea floor to

"day 45 could be in high 50's"

[Don]

example from outside the casing  
a little over 1000 psi depletion (1100)

closer to 16-18

[George]

Exhibit No.  
8843

Worldwide Court  
Reporters, Inc.

PNL003-003363

<sup>P<sub>30p</sub></sup>  
 44/00 — topkill  
 junk  
Woods Hole 900 psi / 3500  
 drop

Paul Hsieh

gave IPR to NL modelers

1800 psi soon after shut in  
 w/ gradual recovery  
 probably ~1500 psi

if AC @ 54/psi what reservoir now?

7000 + 8 / 12000

13000 w/ + Res

slightly over 10,000 10,000 psi

WIT  
Derwin

David Hays there at time of  
 fire — no visible oil, assuming  
 all burned

OFFICIAL USE ONLY

did also not believe any diesel

ok w/ (10% uncertainty)

and → Sheldon B. Sheldon quotes getting started  
 by Scott Chu "gov best estimates" will end. to refine"  
 So Sheldon wants no error bar!

3/3

Tom Hunter still

Pushing for 10%, integrated or daily

Will add

Cabinet wants clean nice number

Uncertainty still being worked out

 $\pm 10\%$  feels better $\pm 5\%$  too tight4.9 mbbbl  $\pm 10\%$  as true est. ref. this

"As far as US Gov neg w/ BP this is good enough." (Steve)

regarding negotiation w/ Indian people

BP collects 0.8 M certifying that  
w/ Cabinet this week

Rod &amp; Secty writing up

"Consent of the tribe" to all Secty Ok
