## Trevor Hill: Purpose of April 28 Modeling

---

Trevor Hill

Q. When you say “it was focused on the erosion work,” what do you mean?

**A. The potential that the restriction of the kink could erode with time.**

Q. And did understanding that potential require you to have an understanding of what your best estimate of the flow rate was?

**A. It required us to look at extreme values to – across a range to see what could happen.**
