

The Case for 5000 bopd at 3800 psi

Hanger Failure – Annular Flow – No Drill Pipe

Permeability 170 mD

Reservoir Thickness 10'

Skin 25

If we drop Pressure to 2270 psi, the flow rate will increase to 6500 bopd (30%)

Hanger Failure– Annular Flow – Drill Pipe Only

Permeability 170 mD

Reservoir Thickness 12'

Skin 25

If we drop Pressure to 2270 psi, the flow rate will increase to 6300 bopd (26%)
