Time Zones

Due to the rapidly changing and growing numbers of area codes we can no longer supply an accurate area code map. Every effort has been made to ensure the accuracy of the information in this product. The publisher, however, cannot assume liability for any errors.

International Dialing Codes

To make an international call it is necessary to dial first the dialing-out code (011 in USA, 011 in Canada but 8011 in Montreal), then the dialing-in code followed by the subscriber number including the city code. For international dialing any first 0 or 9 should be omitted from the city code, except for France where the 15 or 16 only should be omitted. For the USA and Canada the full city code is dialed.
