

ART Produced Marginal Results

Alternative Response Technology (ART) Program
Final Report
MC252 Deepwater Horizon Response
September, 2010

Goals

To improve the efficiency and effectiveness of response and cleanup operations through evaluation and testing of new and improved response technologies.

TREX-232987.000006

A summary of the 5 month program is provided below.

- The ART team received and evaluated nearly 123,000 individual ideas, suggestions and proposals for ending the MC252 well flow (80,000 suggestions) or cleaning up the resulting spill (43,000 suggestions)
- Nearly 100 suggestions were formally evaluated and/or field tested, and 25 of these have seen significant use during the current response operations.
