Attachments:

Mike (and Lars):

The attachment is basically a letter dated May 5, 2010 from Anadarko (Jim Hackett, Chairman and CEO) to Secretary Salazar offering assistance in any way to DOI regarding the ongoing Macondo well situation.

Anadarko acknowledges its 25 percent non-operating working interest ownership in the well, and also acknowledges that it is working with BP in a technical advice capacity on efforts to close the blowout preventers and otherwise contain the flow of oil.

Anadarko also asserts that it did not have input into the design of the well, drilling procedures, or vendor/equipment selection as those are all functions of BP as operator.

Anadarko concludes by saying they are committed to understanding the causes of the incident and believes it can help assure that remedial measures taken are valid.
